TELUS Commercial Smart Building Solutions Webinar

Thursday, April 24, 2025

with

TELUS Enterprise Solutions

Join us for an enlightening 60-minute session where TELUS demonstrates how BuildingOS can address IFMA members' critical facility management challenges. Learn how our industry leading advanced building operating system can help reduce operational and energy costs while reducing equipment wear and tear without compromising occupant comfort. Our scalable platform aggregates data from multiple systems, providing actionable insights for energy management, real-time system monitoring, and proactive maintenance – addressing key pain points in modern facility management. Discover how TELUS BuildingOS can help your organization achieve its sustainability goals while optimizing building performance through smart, digital solutions.

Elevate your environment with TELUS Commercial Smart Building solutions

Integrating advanced technology to create sustainable, intelligent buildings, prioritizing the occupant experience

Rising energy costs, ESG mandates and flexible work environments are putting new demands on your space. TELUS Business' smart building solutions empower you with the technologies to meet these challenges. Discover how our tools can enable you to optimize the performance of your building and offer your occupants a more intelligent, secure and connected environment.
