Digital Project Delivery for Facility Management

PRESENTED BY IFMA™ Northern Alberta Chapter
International Facility Management Association

Join us for a two day Training Session that will provide you the tools you need to really understand Digital Project Delivery (DPD) for Facility Management (FM).

Whether you're a facility manager, owner, consultant, or contractor, this course will provide you with the fundamental background and knowledge of DPD so that you can prepare your organizations for the future.

DECEMBER 12TH, 13TH, 2019

The days of rolled up paper as-built drawings and three ring binder Operations & Maintenance Manuals are numbered. Sometimes they're never delivered at all. Owners and FM staff do not have to settle for this. Consultants and contractors can deliver this information more effectively. In the end, everyone will be able to improve their business bottom lines.

Technology has been adopted throughout the world to improve business bottom lines.....except in the design and construction industry! The right technology has arrived and you need to know how your organization can best leverage DPD workflows! This Course is for Facility Managers, Owners, Designers and Contractors so that everyone can do things better!

This curriculum was built by Holo-Blok. Glenn Matich, IFMA NAC Vice President will Host and Moderate the course, along with industry experts lined up to teach the course! You will learn pertinent and relevant information regarding DPD from a Client's perspective. This course will help you establish the FM outputs required by the design and construction industry.

DECEMBER 12TH, 13TH, 2019
8 A.M. - 4 P.M.
